The American Samoa Telecommunications Authority

Description of Functionality In Emergency Situations

Back-up Power for Both Voice and Broadband Services

The American Samoa Telecommunications Authority provides all its Offices/Switches with back-up power capabilities with the attached listing of Generators by location. If outages do occur, the Company has 24-hour on call staff or first responders to all emergency situations within our control. The Company certifies that it follows best practices that are designed to allow them to remain functional in an emergency situation through the use of back-up power to ensure functionality in the event of a limited commercial power failure.

The American Samoa Telecommunications Authority utilizes battery back-up systems and standby generators in its central offices and remotes. This enables The American Samoa Telecommunications Authority to maintain power during an outage of at least 48 hours with battery back-up and several days with fuel. The American Samoa Telecommunications Authority also uses portable gas powered generators to support the remote cabinets in the network in the event of an extended power outage.

The Company performs routine power-up checks to test disaster preparedness on each site's back-up power systems. Major transport facilities are also tested periodically to ensure failover reliability.

Ability to reroute traffic/data around damaged facilities

The American Samoa Telecommunications Authority has the capability to reroute traffic/data using the Host/smart remotes located throughout the island which can act as standalone switches in the event that facilities are damaged.

Capability to manage traffic/data spikes resulting from emergency situations

The American Samoa Telecommunications Authority trunk routes are monitored by Central Office equipment for usage utilization and management. The American Samoa Telecommunications Authority takes no responsibility for the capabilities of interconnected

networks to manage traffic spikes resulting from emergency situations, but will continue its best efforts for its networks during such events.

The American Samoa Telecommunications Authority Voice Services Rate Comparability

As evidenced by the data provided in line 700 of this Form 481, the American Samoa Telecom Authority's voice service pricing is no more than 2 standard deviations above the national average urban rate (\$49.51) as announced by the Wireline Competition Bureau on February 14, 2017 (DA 17-167)

**American Samoa Telecommunications Authority
Broadband Services Rate Comparability
In American Samoa**

The American Samoa Telecommunications Authority Broadband Services Pricing does not meet the FCC's broadband reasonable Comparability Benchmark announced by the Bureau on April 11, 2017 (DA17-346).

In furtherance with its broadband public interest obligation pursuant to 54.308(a), The American Samoa Telecommunications Authority would offer broadband service, upon reasonable request, at actual speeds of at least 10 Mbps downstream/1 Mbps upstream, with latency suitable for real-time applications, including Voice over Internet Protocol, and usage capacity that is reasonably comparable to comparable offerings in urban areas, at rates that are reasonably comparable to rates for comparable offerings in urban areas.

If a request for broadband service at actual speeds of at least 10 Mbps downstream/1 Mbps upstream is unreasonable, and offering broadband service at actual speeds of at least 2 Mbps downstream/2 Mbps upstream is reasonable, The American Samoa Telecommunications Authority offers broadband service at actual speeds of at least 2 Mbps downstream/2 Mbps upstream but at pricing above the bureau's broadband reasonable comparability service rates.

Currently, The American Samoa Telecommunications Authority has had no reasonable requests for broadband service at actual speeds of at least 10 Mbps downstream/1 Mbps upstream. However, as shown by the response to Line 710 on its Form 481 filing, The American Samoa Telecommunications Authority offers broadband service of 2 Mbps downstream/2 Mbps upstream.

American Samoa Telecommunications Authority Lifeline

Lifeline customers MOU and additional toll charges

Lifeline subscribers receive the same residential service as a regular subscriber, but at a reduced monthly recurring rate. Thus, lifeline subscribers have an unlimited number of local calling minutes. As for toll, lifeline subscribers, similar to every American Samoa Telecommunications Authority's subscriber, are free to choose their own toll usage plans through IXC's that serve American Samoa Telecommunications Authority.

Re: WC Docket No. 14-58, 2015 Annual Report, Form 481 for High-Cost Recipient
54.313(f)(1) "Public Interest Obligation"

Dear Ms. Dortch:

In compliance with the filing requirements associated with, and attached to Form 481, we wish to advise the Commission that American Samoa provides High Speed Internet service to its customers and:

- Has taken reasonable steps to provide upon reasonable request broadband service at actual speeds of 10 Mbps downstream / 1 Mbps upstream;
- Provides latency suitable for real-time applications including VoIP and usage capacity which is reasonably comparable to those in urban areas and;
- That reasonable requests for service are met within a reasonable timeframe.

If a request for broadband service at actual speeds of at least 10 Mbps downstream / 1 Mbps upstream is unreasonable, and offering broadband service at actual speeds of at least 2 Mbps downstream / 2 Mbps upstream is reasonable, our company offers broadband service at actual speeds of at least 2 Mbps downstream / 2 Mbps upstream.

If there are questions, I may be contacted at jason.betham@astca.net or 684-699-1121.

Sincerely,

Jason Betham
